

ArrowBerry Definition of Done:

Task:

A task is not defined as done until:

- The feature has been properly coded and works as intended.
- The relevant documentation has been updated
- Comments have been added to each new function marking description and return type
- Style guidelines have been followed
- Unit tests have been created and passed
- You have locally tested and tried to break the new feature in every way you can think of, and have fixed any bugs that have appeared

User Story:

A user story is not defined as done until:

- All tasks are completed in their entirety (according to task definition of done)
- Integration test(s) has been created and passed
