

Acceptance Criteria:

User Story 1: As a shopper, I want to be able to take a picture of my receipt so that I don't have to type each ingredient I have into the app.

- Must be able to grant camera permission
- Must be able to take photos
- Photos must then be added to the text extraction and reasoning pipeline
- Must be able to delete and retake photos
- OCR must be able to extract at least 90% of the receipt

User Story 2: As a user, I would like to be recommended recipes that can be made only with the ingredients that I have, so that I can know exactly what I can make

- Must be recommended recipes prioritizing the ones that you have a higher percentage of the ingredients
- Must be able to open and close recipes
- Must be able to see the ingredient list, the description, the instructions, and the prep and cook time

User Story 3: As a forgetful person, I would like a 'digital pantry' page where all the ingredients I have can be visualized, so that I can be aware of what I have while I am not in my kitchen/pantry

- Must be able to manually add an ingredient to your pantry
- Must be able to receive the extracted data from camera
- Must be able to edit and delete an item

User Story 4: As a user, I would like to save my favorite recipes to my profile so that I can quickly access them at any time

- Recipe card must have a save to profile section
- Profile must have a saved recipes section where you can view the card
- Must be able to unsave a recipe from the profile section

User Story 5: As an active user, I want to be able to rate each recipe so that I can see what myself and others think of the recipe

- Must be able to view existing reviews
- Must be able to write a new review
- Must be able to give the recipe a star rating

User Story 6: As a forgetful person, I want a shopping list feature so that I can remember what I need to buy at the store

- Must be able to access the shopping list from the pantry page
- Must be able to manually add ingredients
- Must be able to delete an item from the list

- Must be able to add missing ingredients from a recipe card to the shopping list with 1 button

User Story 7: As a user with allergies, I want to have the option/filter to avoid recipes that might be allergic to me.

- Create section in profile to allow user to select dietary preferences
- Adjust algorithm to not allow user to see recipes which don't align with their dietary preferences
