

Sprint #1 Report - ArrowBerry

Actions to stop doing: The team should stop pushing to the main branch, in case any pushes break the currently working codebase. The team should stop working on tasks that are not necessary for the MVP while the MVP is still not complete.

Actions to start doing: The team should use better version control to keep a log and ensure the reliability of the main branch. The team should start better documenting their code to improve understandability. The team should update existing files to include new dependencies they are installing.

Actions to keep doing: The team should keep consistently updating the rest of the team on their progress through their tasks. The team should continue to notify the team about issues affecting their ability to get their work done. The team should keep meeting after class everyday and briefly discussing what they are working on and their next steps.

Work Completed:

1. All basic infrastructure tasks including building the react native environment and creating blank pages to begin app GUI: 4 points
 - a. As a user I want different pages for different features of the app so that it is easily navigable.
2. Setup database schema and user authentication: 4 story points
 - a. As a user I would like secure authentication and for the app the remember the things I like and have in my pantry so that I can come back to the app later.
3. Camera receipt scanner/image to text pipeline fully integrated: 8 points
 - a. As a lazy user, I would like to be able to take a picture of a receipt so that I don't have to manually add items to my account.
4. Recipe page and recipe algorithm created: 7 points
 - a. As a user, I would like to be recommended recipes that can be made only with the ingredients that I have, so that I can know exactly what I can make
